

# GEOTIC SECTION

Draws and shows data relations

GeoticSection is a user-friendly software that allows you to visualize and create planes and section books from your Geotic databases.

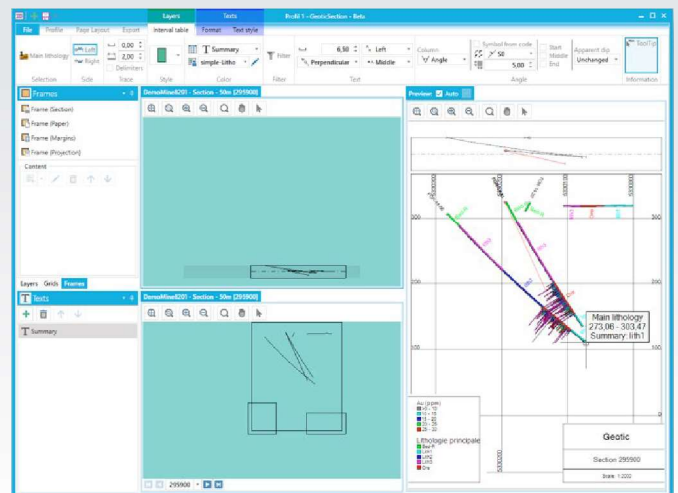

Sections can be created from planes with **the same simplicity as GeoticMine.**

- ✓ Create vertical, inclined, or horizontal sections from your GeoticMine profiles or create new ones that will contain all the information available from your database.

## USEFULL TOOLS

- ✓ Prepare your next drilling program with its drillhole planning tool.
- ✓ Calculate coordinates from your data.

- ✓ Compatible with Windows 10 and up.
- ✓ Export to PDF, GeoticCAD, AutoCAD, DXF, 2D drawing format (BMP, JPG, PNG)
